## Sectional view

Feed separator		
[1]	Housing	Wrought aluminium alloy (coated with CompCoat)
[2]	Plunger	High-alloy steel
[3]	Piston rod	High-alloy steel
[4]	End cap	High-alloy steel
-	Seals	Nitrile rubber
	Note on materials	Copper/PTFE-free
		RoHS-compliant

**Note**

The plunger slideways in the housing are determined by choosing the appropriate fit, and cannot be adjusted. The necessary basic lubrication is applied during assembly. We recommend that the feed separator be re-lubricated after 2 million cycles.

1) If the max. permissible weight of the external add-on plunger separator is exceeded, the retracting and advancing times must be adapted in accordance with the table below using one-way flow control valves. Failure to do so may result in components of the feed separator being damaged.
